

**Amendments to the Specification:**

Please replace the first full paragraph on page 1 with the following rewritten paragraph:

**Field of the Invention**

The present invention relates to a device for discharge or outfeed of a pasty product, preferably foodstuff, from a container, wherein the discharge of the product from the container is accomplished by imparting a triggering movement to a trigger, said triggering movement being transferred to a piston means such that said piston means is brought to perform a discharge movement in a discharge direction for discharge or outfeed of the product from the container.

Please replace the second full paragraph on page 1 with the following rewritten paragraph:

**Background of the Invention**

Discharge devices for discharge or outfeed of pasty foodstuff products from containers are known from the publications WO 00/53512 and US 4 090 639. A discharge device however, is lacking, which permits non-drop discharge or outfeed of product as well as easy setting for portioning of different dose volumes.

Please replace the first full paragraph on page 2 with the following rewritten paragraph:

**Summary of the Invention**

The object of the present invention has therefore been to provide an adequate discharge device which eliminates this problem.

Please amend the third full paragraph on page 2 as follows:

**Brief Description of the Drawings**

The invention will be further described below with reference to the accompanying drawings, in ~~which~~ which:

Please amend the fourth full paragraph on page 2 as follows:

~~figure 1~~ Figure 1 is a perspective view of a discharge device having a device according to the invention; and

Please amend the fifth full paragraph on page 2 as follows:

~~figure 2~~ Figure 2 is a side view of an enlarged part of the device of figure 1 with hiding details removed.

Please replace the sixth full paragraph on page 2 with the following rewritten paragraph:

**Description of the Preferred Embodiments**

The discharge device 1 illustrated in the drawings has a gun or pistol like shape and is adapted for discharge or outfeed, in portions, of pasty products 2, preferably foodstuff such as mayonnaise, ketchup, mustard or similar, from a container 3.
